

Turn data into profitable knowledge.

EFT Analytics provides SaaS-based advanced analytics, energy management solutions, and professional services for large industrial companies. As a subsidiary of Koch Industries, one of the largest private companies in the world, EFT combines advanced analytics software with Koch's operational excellence to provide powerful, yet easy to use platforms that are proven to deliver results, again and again.

Data science results for non-data scientists.

EFT delivers predictive analytics, process optimization, operational efficiency and energy management solutions for **more than 100 blue chip clients** all around the globe. See how EFT can do the same for you at EFTanalytics.com.

Partners

Company Highlights

- Founded in 1998
- Offices in Dublin, New York and Wichita

Textiles

Get Started with EFT

We're all about long-term value. We'll help you find it in any engagement.

1 Are you leveraging your data?

We get subject matter experts (SME) up close and personal with their data to deliver value in significant areas.

2 Evaluate your use case.

What specific problem have you been working toward solving? What is this issue costing you?

3 Choose your SME.

Partner your SME with our team – we'll walk through implementation and functionality for future initiatives.

4 Deliver Solutions.

View operations in real-time. Build models to analyze processes. Apply predictive analytics capabilities to specific efforts.

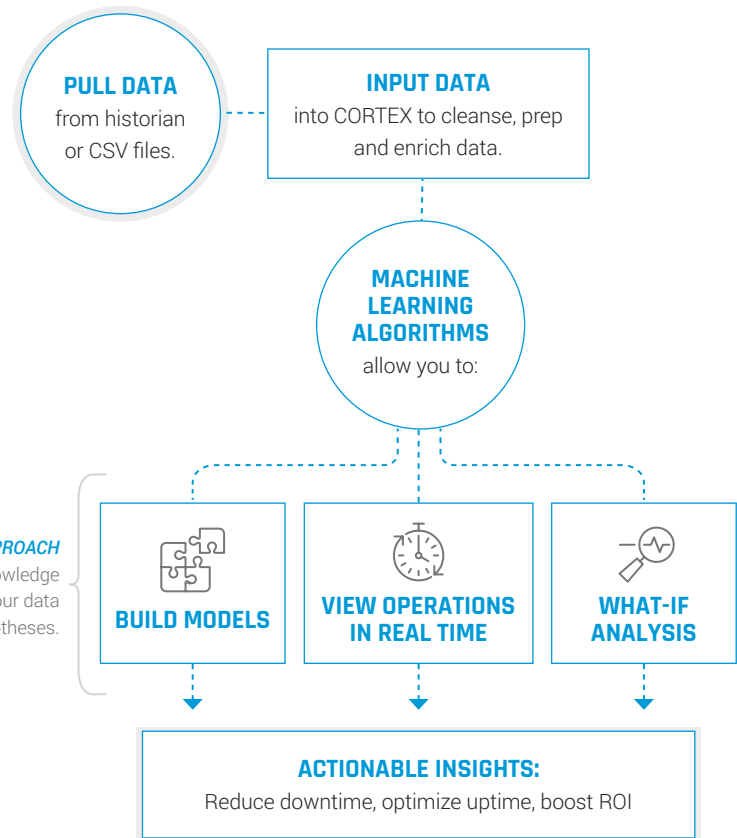

CORTEX™

CORTEX™ is our advanced analytics platform that drives profits by increasing operational efficiencies such as increased production and decreased downtime. Using machine learning and real-time visualization, CORTEX provides descriptive, predictive and actionable insights to optimize processes like never before.

Where CORTEX delivers results:

- **Root Cause Analysis**
Find out the “why” and address it
- **Event Prevention**
Predict and overcome failures
- **Optimization**
Fine-tune for peak performance

CLEAR BOX APPROACH
Apply SME knowledge to personalize your data and test hypotheses.

ENERGYMANAGER

Energy Manager takes your meter data, production data and other data sources to deliver deep, crystal-clear insights into energy spending, consumption, and productivity. Take your energy analysis to the next level by gaining complete control that results in significant energy savings.

YOU CAN'T OPTIMIZE WHAT YOU CAN'T SEE.
Platform capabilities give you a deeper look into energy consumption.
